

Leona Motyer

Platform Engineer & Software Developer

Leona@motyer.ca | 250-258-1143 | github.com/leonamotyer | linkedin.com/in/leona-motyer/ | Motyer.ca

Education

Software Development Diploma, Southern Alberta Institute of Technology (SAIT) 2023 – 2025

Experience

Platform Engineer, Collective i - 2024 – Present

Cut Datadog ingestion costs by more than my own salary via log tuning, dashboards, grok parsing filters, and retention strategies. Built Datadog dashboards, composite alerts, and noise-reduced monitors. Deployed AWS cost monitoring replicable via Terraform — tagged, consolidated, and automated multi-account visibility. Managed IaC with reusable Terraform modules (IAM, EC2, S3, billing, VPC). Automated MacBook encryption and config using Jamf for compliant onboarding. Supported AWS data migration and access control setup. Assisted SIEM integration across cloud/SaaS providers. Built a Snyc-to-Google Sheets API pipeline for weekly vuln trend reports and charts.

Projects

Motyer.ca

React + Tailwind personal portfolio, live APIs

YYC Food Trucks

Full-stack ops platform: shift scheduling, event tracking, and real-time staff availability.

Rollin' in Dough

E-commerce site for a local bakery with product listings and custom checkout.
